SUMMARY

First-year Electronic Engineering student specializing in Communication Engineering, ranked in Cambodia's top 0.5% nationally. Solid foundation in circuit analysis, engineering mathematics, and C programming—skills directly applicable to radio network logic, power systems monitoring, and structured troubleshooting. Hands-on workshop experience with physical equipment and site environments. Seeking an internship in RAN planning or NOC operations to apply strong analytical discipline to real telecommunications infrastructure.

EDUCATION

Guilin University of Technology | Guilin, China

Expected Graduation July/2029

- Bachelor of Electronic Engineering, Specialization in **Communication Engineering**
- Relevant Coursework: Circuit Analysis, Engineering Physics, Mathematics (Calculus I-III) and Linear Algebra, C Programming, Introduction to AI Applications, Engineering Workshop Practice.

ACHIEVEMENTS

Honor & Awards

- National Baccalaureate Exam 2023 (BACII) - Grade A, ranked 617th out of 133,000+ candidates
- Third Prize - Chinese Listening and Writing Competition in Guangxi Province in 2025
- Certificate of Excellence - Chinese Language Studies in 2025
- HSK Level 5, Scoring 211 in 2025
- Scoring 115/160 on the Duolingo English Test.(Equivalent to IELTS 6.5) in 2024

Scholarships

- Chinese Government Scholarship: Full scholarship recipient for undergraduate study in China
- Cambodian Government Scholarship (AMT): Full scholarship awarded for study at Institute of Technology of Cambodia (prior to China studies)

PROJECTS

Environmental Monitoring & Alert System | Self-Study, Winter 2026

Built a light/dark detection circuit using a Photoresistor and SR latch with 1-bit memory—triggers a buzzer alarm with LED feedback, state held until manual reset. Sensor swappable for temperature, RF, or motion.

Key Skills: Circuit Design, Analog Sensors, SR Latch, Modular Hardware

Database Management System in C | University Project, Dec 2025

Developed full record management system in C with add, search, and sort functions. Implemented Binary Search and Bubble Sort with modular architecture.

Key Skills: C Programming, Algorithms, Data Structures

Personal Portfolio Website | Self-Initiated, Winter 2026

Self-taught HTML/CSS using C programming logic as foundation. Built responsive portfolio site to showcase projects.

Key Skills: HTML & CSS, Responsive Design, Self-Directed Learning

SKILLS AND LANGUAGES

Technical

Circuit Analysis, Analog Sensors, C Programming
HTM&CSS, Debugging & Troubleshooting

Tools

Microsoft Excel, Multisim, Matlab, EasyEDA, ArduinoIDE,
VisualStudioCode

Professional

Technical Documentation, Incident Logging,
Structured Problem-Solving, 24/7 Shift Ready

Languages

English : Fluent
Chinese : Fluent
